

PARENT GUIDE

A picture is worth a thousand words, but what about emojis?

These small icons have become a language of their own. You, your kids and your grandkids use them, but not all in the same way. If you have ever looked at a text thread with bewilderment, wondering why your child sent you a skull emoji when you said something funny—or a nails emoji when you didn't say anything about getting your nails done—then this guide is for you!
